

ESCORT RESPONSIBILITIES FOR OUTPATIENT IV SEDATION

Be present in the facility before and after completion of the operation: You are required to be present when checking the patient in for his/her procedure. Please be available during the entire procedure time should we finish early. The patient will be released to your care upon completion of the procedure and sufficient anesthesia recovery.

Don't allow the patient to drive: You will be required to drive the patient home and stay with them for a minimum of 8 hours post procedure. Patients who have had sedation should not drive for the rest of the day.

Please relay any post-op instructions you received from the provider to the patient: The medications given will cause amnesia and they most likely will not remember any instructions given to them by our staff upon completion of the procedure.

I understand my assigned role and responsibilities as listed above. I agree to adhere to my responsibilities as a patient escort.

Name: _____ Relationship to Patient: _____
